FREE VISION SCREENING!

Our organization is scheduled to perform <u>FREE Vision Screenings</u> at your child's preschool. Young children don't always know they are having trouble seeing because they often don't know how they should see the world around them. Most eye problems do not go away as a child grows! Early detection and treatment yields the best results. Parents should also be alert for signs of vision problems that include: frequent rubbing of the eyes, holding books and papers close to the face, squinting, excessive blinking, or tilting of the head from one side to the other. Covering one eye to favor the other, frequent sties or redness, and even watery eyes can also be signs of a vision problem.

The screening will be conducted by our highly trained staff using the latest technology--the Welch Allyn SPOT Screener, a camera like device that scans the eye for SIX different vision problems in a matter of seconds. Please fill out the consent form below and return to your child's preschool as soon as possible. Only children with signed consent forms will be able to participate.
